

CONCISE DESCRIPTION OF RELEVANCE — THIRD-PARTY SUBMISSION UNDER 37 CFR § 1.290

U.S. Application No. 19/315,746 (Publication No. US 2026/0109053 A1)

Document 10: U.S. Patent Application Publication No. US 2025/0354568 A1 (“Document 10”)

Publication Date: November 20, 2025

This document discloses a compressed-air-driven vacuum generation device with a silencer apparatus and multiple modules, including an interface module, control valve module, control piston module, nozzle module, and silencer module. Its potential relevance to the claims of the above-identified application is set forth below.

Claim language (US 2026/0109053 A1)	Relevant disclosure of this document
Claim 1: “exhaust air discharged by the vacuum generating device is guided through the grip portion to an air outlet, and”	The silencer apparatus has flow openings in its outside through which the compressed air flowing through the vacuum generation device can escape to the outside. “The silencer apparatus has flow openings in its outside through which the compressed air flowing through the vacuum generation device can escape to the outside.” • Paragraph [0020]
Claim 1: “a sound-damping device is arranged in the grip portion”	The vacuum generation device has a silencer apparatus. “The vacuum generation device has a plurality of nozzle lines, each with at least one ejector nozzle for generating a vacuum from compressed air. Furthermore, the vacuum generation device has at least one compressed-air connection for connection to an in ...” • Paragraph [0002]
Claim 2 (The grip unit according to claim 1, wherein the grip portion is at least partially lined with a sound-damping material)	The compressed-air-driven vacuum generation device has a silencer apparatus. “The compressed-air-driven vacuum generation device has a silencer apparatus, wherein the nozzle lines open into the silencer apparatus.” • Claim 1
Claim 4 (The grip unit according to claim 3, wherein a sound-reducing device is arranged in the first housing portion or the first housing portion is lined with sound-reducing material)	The compressed-air-driven vacuum generation device has a silencer apparatus. “The compressed-air-driven vacuum generation device has a silencer apparatus, wherein the nozzle lines open into the silencer apparatus.” • Claim 1

Claim language (US 2026/0109053 A1)	Relevant disclosure of this document
Claim 7 (The grip unit according to claim 1, wherein downstream of the grip portion, in on or in the second housing portion, one or more, bent or curved, air baffles are arranged for ...)	The vacuum generation device can be designed and configured for suctioning and handling objects. “The vacuum generation device can also be designed and configured for suctioning and handling objects. According to a preferred embodiment of the invention, it is provided that the valve device be designed and configured to block and open a first ...” • Paragraph [0008]
Claim 10 (The vacuum handling apparatus according to claim 9, wherein the grip unit and the suction plate are releasably connected to one another via a coupling device)	The vacuum generation device 1 consists of a plurality of modules, including an interface module, a control valve module 38, a control piston module 57, a nozzle module, and a silencer module, which are reversibly separable using plug-in connectors. “The vacuum generation device 1 consists overall of a plurality of, in particular five, modules, viz., the interface module, the control valve module 38 , the control piston module 57 , the nozzle module, and the silencer module. These modules ...” • Paragraph [0036]
Claim 11 (The vacuum handling apparatus according to claim 9, wherein the grip unit has a suction opening, which is fluidically connected to a suction chamber delimited by the suction plate ...)	The compressed-air-driven vacuum generation device has a suction channel and nozzle lines arranged in a nozzle apparatus. “The compressed-air-driven vacuum generation device according to claim 6 , wherein the suction channel and the nozzle lines are arranged in a nozzle apparatus.” • Claim 1
