U.S. Application No. 19/315,746 (Publication No. US 2026/0109053 A1)

Document 8: U.S. Patent No. 12,290,918 (“Document 8”)

First Named Inventor: Min Xu

Issue Date: May 6, 2025

Title: Rubber part structure for vacuum suction pad and vacuum suction pad with replaceable rubber part

This document discloses a rubber part structure for a vacuum suction pad, including a rubber part with an air hole, a ring-like lip edge, an air extraction chamber, and a flanging for connection to a vacuum suction pad. Its potential relevance to the claims of the above-identified application is set forth below.

Claim language (US 2026/0109053 A1)	Relevant disclosure of this document
Claim 1: “wherein the grip portion is designed as a hollow body”	The grip (10) is U-shaped. “The grip 10 is U-shaped.” • Paragraph [0015]
Claim 1: “exhaust air discharged by the vacuum generating device is guided through the grip portion to an air outlet, and”	An air extraction and discharging channel (16) is provided in the grip (10) on one side of the mounting hole (14). “an air extraction and discharging channel (16) is provided in the grip (10) on one side of the mounting hole (14); one end of the air extraction and discharging channel (16) is ...” • Claim 4
Claim 9 (A vacuum handling apparatus comprising)	The reference discloses a vacuum suction pad with a replaceable rubber part. “A vacuum suction pad with the replaceable rubber part, comprising a rubber part (1)” • Claim 1
