

CONCISE DESCRIPTION OF RELEVANCE — THIRD-PARTY SUBMISSION UNDER 37 CFR § 1.290

U.S. Application No. 19/315,746 (Publication No. US 2026/0109053 A1)

Document 1: SU 1181867 A1 (“Document 1”)

Publication Date: September 30, 1985

This document discloses a vacuum tap containing a suction cup and a chamber with central and tangential channels, where the suction cup cavity is connected to the central channel, and the tangential channels are connected to a compressed air source. Its potential relevance to the claims of the above-identified application is set forth below.

Claim language (US 2026/0109053 A1)	Relevant disclosure of this document
Claim 1: “a housing which has a grip portion for gripping the grip unit, and an, electrically operated, vacuum generating device”	The reference discloses a VACUUM TAP containing a suction cup and a chamber with central and tangential channels, and a compressed air source. “VACUUM TAP containing a suction cup and a chamber with central and tangential channels, the suction cup cavity being connected to the central channel, and the tangential channels being connected to a compressed air source ...” • Claim 1
Claim 9 (said suction plate comprising a carrier plate and a seal, which is fastened to the carrier plate and extends around the carrier plate; and)	The reference discloses a VACUUM TAP containing a suction cup. “VACUUM TAP containing a suction cup ...” • Claim 1
Claim 11 (The vacuum handling apparatus according to claim 9, wherein the grip unit has a suction opening, which is fluidically connected to a suction chamber delimited by the suction plate ...)	The reference discloses a suction cup cavity being connected to the central channel. “VACUUM TAP containing a suction cup and a chamber with central and tangential channels, the suction cup cavity being connected to the central channel ...” • Claim 1
