U.S. Application No. 19/315,746 (Publication No. US 2026/0109053 A1)

Document 2: WO 2021119698 A1 (“Document 2”)

First Named Inventor: Gerhard Angerer

Publication Date: June 24, 2021

Title: Vacuum gripper element and vacuum gripper device

This document discloses a vacuum gripper element and a vacuum gripper device designed to suck against or hold a component to be transported when a vacuum is supplied. Its potential relevance to the claims of the above-identified application is set forth below.

Claim language (US 2026/0109053 A1)	Relevant disclosure of this document
Claim 9 (A vacuum handling apparatus comprising)	The reference discloses a vacuum gripper device (24) that is designed to suck against or to hold a component that is to be transported when a vacuum is supplied. “The invention relates to a vacuum gripper element (1) and a vacuum gripper device (24) which are designed to suck against or to hold a component that is to be transported when a vacuum is supplied.” • Abstract
Claim 10 (The vacuum handling apparatus according to claim 9, wherein the grip unit and the suction plate are releasably connected to one another via a coupling device)	The reference discloses a first fastening means (5) formed by a detent coupling (8) for interlocking connection and release of the vacuum gripper element (1) to/from the support device (6). “A first fastening means (5) is formed here by a detent coupling (8) for interlocking connection and release of the vacuum gripper element (1) to/from the support device (6) as necessary.” • Abstract
