*First Named Inventor:* Peter Tell

*Publication Date:* February 2, 2012

*Title:* Suction cup having replaceable sealing surfaces

This document discloses a suction cup for a tool driven by vacuum, where the suction cup is coupled to a sealing ring, and elements can be combined using coupling means. Its potential relevance to the claims of the above-identified application is set forth below.

| Claim language (US 2026/0109053 A1)                                                                                                                                      | Relevant disclosure of this document                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
