First Named Inventor: Ho-Young Cho

Publication Date: January 9, 2014

Title: Vacuum gripper device

This document discloses a vacuum gripper device used in a vacuum transfer system, which includes a vacuum pump directly embedded in a negative pressure chamber of a gripper main body, and is designed to quickly form a desired level of vacuum pressure. Its potential relevance to the claims of the above-identified application is set forth below.

Claim language (US 2026/0109053 A1)	Relevant disclosure of this document
Claim 1: “a sound-damping device is arranged in the grip portion”	The reference discloses a silencer 29 that is combined with the second hole 12 such that the silencer 29 communicates with the outlet 28. “reference numeral 29 denotes a typical silencer that is combined with the second hole 12 such that the silencer 29 communicates with the outlet 28 .” • Paragraph [0012]
Claim 9 (A vacuum handling apparatus comprising)	The reference discloses a vacuum gripper device used in a vacuum transfer system. “The present invention relates to a vacuum gripper device used in a vacuum transfer system.” • Abstract • Paragraph [0013]
Claim 10 (The vacuum handling apparatus according to claim 9, wherein the grip unit and the suction plate are releasably connected to one another via a coupling device)	The reference discloses that the suction plate 30 is mounted to the gripper main body 10 using locking bolts. “The suction plate 30 is mounted to the gripper main body 10 using locking bolts ...” • Paragraph [0013]
